Profile

I am a dedicated software engineering student with a solid foundation in coding and a proven track record of hands-on experience. My background includes working on diverse projects as part of groups and individually, where I have not only applied my technical skills but also embraced new challenges to continuously expand my knowledge. Im eager to further develop my skills in a professional setting, I am actively seeking opportunities to contribute to and grow within a forward-thinking organization.

Projects

Cafe Ordering Mobile Application

- Kotlin, Jetpack Compose, Firebase Realtime DB
- Developed a mobile app for cafes allowing users to browse menus, place orders, and give feedback. Designed intuitive UIs with real-time data syncing.

Smart Finance Manager App

- Flutter, Dart, Firebase, TensorFlow Lite, Plaid API
- Developed a cross-platform financial management application featuring real-time expense tracking, AI-powered budget analysis, and interactive financial trivia games. Integrated Plaid sandbox for bank account linking and auto-import of transactions. Implemented local AI using TensorFlow Lite for spending predictions and personalized budgeting.

Smart IoT Intrusion Detection and Alert System

- ESP8266, Arduino IDE, C++, Blynk IoT Platform
- Built a real-time IoT home security system using motion sensors, infrared sensors, buzzer alerts, LCD output, and mobile app notifications via Blynk. Enabled remote system control, live alerts, and power-efficient sleep modes. Integrated OTA updates and sensor fusion for accurate detection.

Web Application: The CryptoShow

- HTML, CSS, PHP
- Collaborated on a full-stack event management site for showcasing cryptographic devices. Designed interactive web pages to support attendee engagement.

Module Selection Tool

- Java, JavaFX
- Simplified final-year module selection with a Java desktop app, improving student decision-making through an efficient and user-friendly interface.

Payment Processing System Prototype

- Java, UI Toolkit
- Implemented payment method selection, data validation, and confirmation stages for a simulated e-commerce environment.

Experience

Software Engineering Student – Ongoing

Collaborated in teams and solo on real-world projects as part of university coursework and self-driven initiatives. Focused on clean code, user experience, and full-cycle software development.

Education

DeMontfort University
2022 - 2025
Software Engineering

Soft Skills

- Problem-Solving
- Collaboration and Teamwork
- Effective Communication
- Time Management
- Adaptability

Extras

Projects portfolio and demo videos
available upon request or at my
linkedin at the top of this cv.

Technical Skills

- Languages: JavaScript, C++, C#, Python, HTML, PHP, Dart, Kotlin
- Frameworks/Tools: Flutter, JavaFX, Jetpack Compose, Git, Firebase, SQL, Android Studio, IntelliJ, Arduino IDE
- Skills: App Development, System Design, Debugging, Testing, Web Design, Embedded Systems, AI Model Integration
